“One day Webinar on Share Market”

On dated 02-07-2020 Commerce department conducted the one day webinar on Share Market. On this occasion we invite Prof. Dr. Ravindra Netawate, D.G. Ruparel College, Mahim, Mumbai as a chief guest and our Hon. Principal Dr. U. V. Navalekar as a president of this one day seminar.

Prof. Dr. Ravindra Netawate delivered his speech and said that Share Market is a program which trains students to work in Share Market Transactions were stagnant during the Corona period, but some transactions took place on a large scale. Work was done in agriculture, pharmaceutical companies and essential commodities, as well as stock market experiments. He wanted to make a living by learning what he could earn and so he needed to make a couple of bucks. The situation was also taken up by a large number of ordinary customers and even those who had such an idea put their transactions in this market

Prof. Dr. Ravindra Netawate said February 19, 2020, marked the stock market peak before the outbreak of the COVID-19 pandemic triggered a freefall in share prices. In the year since, the world has changed, transforming our lives, our economies, and the fortunes of our businesses—an unfolding journey that is reflected in the ups and downs of share prices. The fundamental trends have accelerated, propelling some companies forward at record speed while for others headwinds have turned into hurricanes.

By pooling investors' beliefs about the future, capital markets are powerful indicators of what could lie ahead. And this view puts the new realities we face into stark relief.

For equity investors, the drama of the past year has played out in four distinct acts, reflecting marked shifts in expectations about the pandemic's duration and its impact on consumers and businesses (Exhibit 1). To illustrate this, we have grouped 5,000 of the world's biggest companies into their respective sectors and examined these sectors' average shareholder returns over the course of the year. We have placed one special set of companies, which we have dubbed the "Mega 25" (more on these later), in a "sector" of their own because their exceptional market performance would skew their industry results.

That webinar Chairperson Principal Dr. U. V. Navalekar sir shares the his view and his experience on Share Market

53 participated attended in this seminar Introduction and vote of thanks is given by prof. Dr. Rupesh Kurhekar.
