One-Day on Workshop E-Commerce

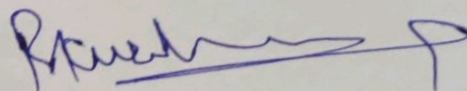

On dated 03-09-2020 Commerce Department conducted the one day workshop on E-Commerce. Our college Head of commerce dept Dr. Rupesh Kurhekar organized workshop for students to aware^{about} ~~ness~~ E-Commerce facility.

The Key-Note speaker Dr. Rupesh Kurhekar said that importance of Today we can buy goods from companies in the field of e-commerce through mobile and sell them at home. It is possible to get goods of any brand in the world safely and without any worries in your home. The city would have been limited to the taluka or in the districts where has less facilities. Imported foreign brands would not have come. The mobile company or the internet provider provides the companies on the server so whether it is laptop or notepad or mobile you get the same item at home and not only what you see on the screen but also you get the facility to send the item back. I think if the item arrives at home then you can buy it Home-to-Delivery means you can avoid this kind of risk if you have in mind that no one will get your money back after taking it from you.

E-commerce is a shopping site on mobile or laptop which means you can go to the site from which you buy the item and get the item you want by going to your market. Yes, but you want to learn e-commerce, so you can learn how to get those things using technology.

When you think of e-commerce, you realize that there are a lot of companies that charge you to deliver at a lower rate or with a special discount, what you call delivery charge.

44 students were participated in this workshop and vote of thanks is given by Monika Pradan .
